Damaged San Antonio Street Bridge Rails Set for Replacement

New Braunfels, TX – The City of New Braunfels has announced that the damaged San Antonio Street Bridge rails will be replaced beginning Monday April 8, 2013 through Monday, April 15 , 2013 between 7 a.m. and 5 p.m.

Three new sections of railing will be installed, as well as four new columns. To obtain a unified appearance in the distinctive structure, each piece will match the look of the existing bridge due to custom staining of the concrete.

Traffic will be reduced to one lane on Monday the 8th, at approximately 9:00 a.m., to set traffic barriers. Various lane closures will occur on weekdays only until the project is completed, so motorists should expect delays in the area.

Work is expected to be concluded within the indicated times, weather permitting. For additional information, please contact John Cox, Street and Drainage Manager at (830) 221-4030
