Fire Department Training in Progress

New Braunfels, TX – The City of New Braunfels Fire Department is utilizing properties scheduled for demolition for training purposes in the Fair Lane, Candlewood and Hillcrest areas. These homes were purchased by the City using grants awarded as part of a FEMA buyout program.

Firefighters will be cutting holes in roofs and walls, raising ladders, stretching fire hoses and utilizing smoke machines to simulate fire-related scenarios as they obtain ventilation training, rescue training and rapid intervention/firefighter down training. No actual fires will be used in this training.

The public should not be concerned if they observe Fire Department activities in this area.
