Landa Park River Front Rehabilitation Project Progresses

New Braunfels, TX – The City of New Braunfels has announced the temporary closure of the Landa Park wading pool to accommodate the Landa Park River Front Rehabilitation Project. This closure will be in effect beginning December 18, 2013.

The contractor, Austin Filter Systems Inc., is currently mobilizing in the wading pool area. The wading pool, surrounding areas and the parking lot off of Landa Park Drive adjacent to the wading pool will be closed to park patrons. These areas are anticipated to reopen in late spring of 2014.

“We ask park patrons to be mindful of construction activities near the wading pool and throughout the Gazebo Circle area,” said Adam Miche, City of New Braunfels Project Manager.

The \$5.5 million project is made up of several components, including the replacement of 4,400 linear feet of stone retaining walls along the Comal River in Landa Park. Other significant features of this project include armoring of the Landa Lake dam, construction of a spillway that will flow into the old Comal River Chanel, replacement of the wading pool pedestrian bridge, riparian landscape improvements and repairs to the Landa Park gazebo.

For additional information, please contact the Parks and Recreation Department at (830) 221-4350 or visit www.nbtexas.org/parkprojects.
