Live Oak Ave / Katy Street Improvements Bond Project Underway

New Braunfels, TX – The Live Oak Ave / Katy Street Improvements Project, cited on Proposition 2 of the 2013 Bond Program, has begun.

This project reconstructs a section of N. Live Oak to raise it out of the floodway. This project will also eliminate a low water crossing and improve access to neighborhoods during and after storm events.

“Design engineers are in the preliminary survey and research phase of the design process. Residents in the Live Oak Ave / Katy Street area may see surveyors collecting preliminary field data over the coming month,” said Project Manager Jennifer Cain. “We will also be taking soil boring samples from the current right-of-way to aid with the geotechnical analysis.”

The City will hold several public meetings to gather ideas, comments and answer questions on the proposed design options prior to final engineering once these initial assessments are completed.

Updates on the 2013 Bond Program can be found at www.nbtexas.org/bond or the Capital Program Facebook page at City of New Braunfels – Capital Programs. For additional information, contact Project Manager Jennifer Cain at 830-221-4646.
