City Lists Upcoming Street Projects Citywide

New Braunfels, TX - New Braunfels City Council has reviewed and approved approximately 100 street projects (not including over 100 other streets scheduled for crack seal applications) after receiving public and staff input, along with information from the City's pavement management system, as part of the overall street maintenance program evaluation.

Streets identified include those that will be addressed as part of the annual maintenance program, funded by the General Fund, as well as those approved by voters for major reconstruction and annual citywide street improvements in the 2013 Bond Program.

Citizens can review the project lists, along with a map showing their locations, on the city website at www.nbtexas.org/streetprojects.
