Fire Station #1 Undergoing Inspection and Sanitization

New Braunfels, TX – In response to a rodent problem discovered at Fire Station #1, its crews and apparatus have been temporarily relocated to Station #4 or Station #6. No appreciable increase in response times is anticipated under this arrangement.

"Protecting the health of our fire fighters is of utmost importance so they can provide the best possible service to our residents," said Fire Chief Kenneth Jacks.

The City has contacted an exterminator to determine the extent of the problem and to provide recommendations on sanitizing the facility. Fire Department emergency response times during this temporary relocation period will be closely monitored and adjustments will be made as necessary to minimize any affect to service to the greatest degree possible.
