Tree Debris Pick Up Offered

New Braunfels, Texas — Residents living within the city limits of New Braunfels that have tree damage from Hurricane Harvey should contact the Solid Waste and Recycling Division at 830-221-4040 to report their location for site assessment for brush pick up by the city.

“To expedite the brush debris removal process, residents should place all brush debris curbside in piles,” said Mike Mundell, Solid Waste Manager. “Do not place brush debris near, on, and under trees, poles, or other structures that would make removal difficult. Please make sure limbs are no longer than 10 feet in length, and no more than 18 inches in diameter. Note, if a resident hires a contractor to cut limbs, the contractor is responsible for removal of the debris. Residents can also self-haul brush debris to the Comal County Recycling and Chipping Center at 280 Resource Drive. However, you should contact the Center first for more information at <http://www.co.comal.tx.us/REC.htm> or call 830.643.3781 prior to hauling your debris there.”

Brush debris removal collection is scheduled to start on Thursday, August 31st and the last day for removal will be Friday, September 15th.
