Public Input Sought for Street Maintenance Plan – Meeting Set for June 18th

New Braunfels, TX - The City of New Braunfels will host an annual, informational presentation and public input meeting on potential street maintenance projects in the Tejas Room at City Hall, 550 Landa Street, from 5:30 to 7:30 p.m. on Tuesday, June 18th.

The initial presentation will feature information about the process used to identify areas for future improvements, currently proposed street maintenance projects, and 2013 and 2019 Bond Program street work.

During the second portion of the meeting, citizens will be asked to provide their input with specific identification of roadways they feel should be evaluated for possible inclusion the 2019 – 2020 Street Maintenance Plan. This data, along with information collected through an upcoming on-line survey, will be analyzed and a proposed plan will be presented to City Council for their consideration.

“City staff will be on-hand to facilitate the data collection process and to answer questions concerning the various types of road maintenance employed in the overall program,” said Public Works Director Greg Malatek. “We encourage residents to take advantage of this opportunity to find out more about how priorities for street maintenance are developed and to share their opinions on which roadways should be considered for next year’s program.”
