San Antonio St. Rehabilitation Project Beginning

New Braunfels, Texas — The City is scheduled to begin rehabilitation work on W. San Antonio Street, from Academy Street to Walnut Avenue, beginning November 18th.

The project will consist of roadway and curb repair that will take place in two phases of half-road widths. Traffic will be transitioned to one side and then the other during each phase to allow two-way traffic to be maintained throughout the duration of the project.

Drivers should expect various road closures on the side-streets adjacent to San Antonio during each phase. The first phase will transfer traffic to the north side of San Antonio and the rehab work will take place on the south side of San Antonio, therefore, most side-streets adjacent to the south side work zone may be closed to thru traffic periodically. Delays may be experienced in the area.

As part of the 2013 Citywide Street Improvements Bond Program funds were approved for maintenance work on the substructure and surface of San Antonio Street. This project will improve the overall rideability of the road in this area and is expected to take approximately three to four months, weather and other factors permitting.

Contact Nate Garza, Capital Project Manager, at ngarza@nbtexas.or or 830-221-4082, for additional information.
