

Don't Trash Your Green Waste!

Trash in Green Waste bags threatens the loss of the program by damaging processing equipment and potentially impacts garbage collection fees.

Green Waste collection helps the environment, and keeps your garbage fees affordable by sending less material to the landfill.

Please don't put the program in danger!

Non-plant items, including plastic bags, pots, shoes, hoses, paper, and metals, CANNOT be in Green Waste bags. Soil, root balls, palms, cactus, and yuccas are also not allowed.
